Experiment # 10: Solubility Product Determination

The solubility product constant, (K_{sp}), is the equilibrium constant for a solid substance dissolving in an aqueous solution. It represents the level at which a solute dissolves in solution. The more soluble a substance is, the higher the (K_{sp}) value it has.

SOLUBILITY AND SOLUBILITY PRODUCT - Instruct

Since the equilibrium constant refers to the product of the concentration of the ions that are present in a saturated solution of an ionic compound, it is given the name solubility product constant, and given the symbol K_{sp} . Solubility product constants can be calculated, and used in a variety of applications.
