Arthroscopy or keyhole surgery is performed using an arthroscope, this is a small telescope approximately 1cm in diameter, it contains a light source and a tiny camera, this is inserted through a small incision (cut) in the skin near the affected joint.

### **Hip Arthroscopy Surgery**

Arthroscopy is minimal invasive surgery that is gaining more and more ground in favor of traditional approaches. The rapid postoperative recovery, reduced pain and accelerated return to physical activity makes it the ideal treatment in sports medicine.
