3 Essential Technology Tools in the Telehealth Toolbox For many patients, Telehealth/Telemedicine is a new way to receive healthcare. The process can be interesting and scary at the same time.

### **3 Essential Technology Tools in the Telehealth Toolbox**

Telehealth nursing encompasses all types of nursing care and services delivered across distances. It is a broad term encompassing practices that incorporate a vast array of telecommunications technologies (such as tele-phone, fax, electronic mail, Internet, videomonitoring, interactive video) to remove time and distance barriers for the delivery of nursing care.<sup>2</sup> Telemedicine technologies ...

### **Exploring the benefits and challenges of telehealth**

Increasingly nurses use various telehealth technologies to deliver health care services; however, there has been a lag in research and generation of empirical knowledge to support nursing practice in this expanding field. One challenge to generating knowledge is a gap in development of a comprehensive conceptual model or theoretical framework to illustrate relationships of concepts and ...

### **Conceptualizing Telehealth in Nursing Practice: Advancing**

It is imperative for nurses to see the telehealth technology as a medium for care, and not a tool to replace high-quality nursing practice. Patient safety will be maintained with telenurses who are able to focus on patient care and not the technology itself.
