word torquere, which means 'to twist' - it is the effort or the cause for an object to rotate. Force is required for an object to start rotating, the direction of the force determines how fast will the object rotate and if rotation will occur. TORQUE The influence exerted on the body that allows it to rotate is the torque (ð•œ•). Torque is directly proportional to the force F and the lever ...

### **Rotational Dynamics | Rotation Around A Fixed Axis | Torque**

The tendency of a force applied to an object to make it rotate about an axis. For a force applied at a single point, the magnitude of the torque is equal to the magnitude of the force multiplied by the distance from its point of application to an axis of rotation.
